## When3Plant.com's Sowing Calendar

## About this calendar

These sowing guidelines are suitable for oceanic climates on the northern hemisphere. The information on this calendar is indicative. The 2nd most important thing to keep in mind when to plant are the weather forecasts given that seedlings can quickly dry out.

## Visit When2Plant.com for

- Convenient wikipedia links for each crop
- Additional sowing calendars for flowers and flowerbulbs
- Ordering seeds and bulbs
- Printing or ordering a copy of this calendar

## Legend

Sowing under glass
Sowing/transplanting outside

Harvest

G = Days from sowing until germination

$\square$
H = Days from sowing until harvest
$\mathrm{L}=$ Minimum length in row after transplanting

## Vegetables

1. Leaf and stem crops
2. Tuber and root crops
3. Onion crops
4. Cabbages
5. Legumes
6. Bleached crops
7. Fruit crops
